SUMMARY

Experienced Software Engineer with over 2 years of expertise in developing both web and mobile applications using Next.js and React Native. Skilled in crafting high-quality solutions tailored to client requirements, with a commitment to staying updated on industry trends and emerging technologies.

PROFESSIONAL EXPERIENCE

PT Nutech Integrasi   *Jakarta, Indonesia*
Frontend Software Engineer   *Aug 2023 – Present*

- Involved in developing CEISA 4.0, a comprehensive web app for the Indonesian Directorate General of Customs and Excise, impacting 5000+ users.
- Developed 25+ document formats and implemented PDF/XLSX rendering using React-pdf, jsPDF and ExcelJS.
- Collaborated with cross-functional teams, including backend and QA engineers.
- Maintained regular and effective communication with the system analyst.
- Utilized Git and Jira for prioritizing enhancements and bug fixes.
- Implemented seamless integration of RESTful APIs using Axios.
- Ensured app quality with comprehensive testing: unit, integration, and end-to-end.
- Built fully responsive user interfaces primarily with Ant Design.
- Collaborated with UI/UX designers to implement visually compelling and intuitive interfaces.
- Crafted comprehensive documentation, aiding stakeholder understanding and future maintenance.

faoTech   *Remote*
Software Engineer   *Sep 2022 – Present*

- Built 7 fully responsive web applications compatible across devices, integrating loading animations for enhanced engagement.
- Collaborated with UI/UX designers to create visually compelling interfaces for seamless user experience.
- Worked with Backend engineers to integrate APIs, ensuring accurate data presentation.
- Proficient in CRUD operations and data manipulation for seamless communication with Backend systems.
- Implemented essential authorization features like login, registration, and password recovery.
- Designed and implemented admin panels with full functionality.
- Optimized content pages for high SEO scores using Google Analytics.
- Implemented internationalization support with i18next framework for enhanced accessibility.
- Spearheaded Backend development, including API creation and integration.
